

WOOD PELLET HEATING

Wood pellets are small compressed cylinders of natural dry wood shavings and sawdust, formed from what was previously waste.

Wood pellets are CO₂ neutral helping to counter Global Warming.

Pellets are supplied either in small bags or in loose bulk, delivered by road tanker.

Typical prices (April 2007) per kg are:

Bagged: 16.5p → 25p

Bulk: 14.5p → 19p

For comparison, 2kg pellets = 1 litre of heating oil.

RIKA Pellet Stoves

RIKA pellet stoves are available for room heating or as a combined room heating and central heating boiler.

Nominal outputs are:

Room heaters – 2-11kW

Central Heating – 2-12kW (15% to room, 85% to water)

- Efficient – over 90% in continuous use
- Controlled burning with microprocessor control
- Easy to clean
- Grants available

OkoFEN Pellet Boilers

OkoFEN Pellematic pellet boilers are available in outputs from 8 – 52 kW.

- Fully automatic operation
- Electric ignition
- Automatic cleaning system
- Long intervals between ash removals
- Available with auger or vacuum pellet feeds from bulk tanks
- Weather compensation programming
- Grants available
